

Why use PROTIM® Solignum® Timber Care

✓ Proven Timber Preservative Range

Trusted and asked for by name by timber specialists, building trades and DIYers as a complete solution for all outdoor timber projects to enhance the aesthetics and durability of all timber.

✓ Recommended by Major Timber Producers' Warranties

Timber producers and wholesalers recommend in their warranties the re-sealing and re-treating of "cut ends" for all treated pine.

✓ Protects Timber from Insect Attack, Fungal Decay and Weathering

While staining or painting provide an external barrier, Timber Care preservatives (CN/Reseal™/XJ™) penetrate into the wood providing protection from the natural enemies of timber - sunlight, water, fungal decay and/or insects. (See chart for more information).

All products are registered with the APVMA (Australian Pesticides and Veterinary Medicines Authority).

✓ Better Coverage Means Better Results in Less Time

Look for Protim® Solignum® Timber Care, manufactured by Koppers Performance Chemicals Australia - the world leaders in timber preservation products and application technologies - for products that provide the best results and proven durability.

PROTIM® Solignum® Timber Care Product Range

Koppers Performance Chemicals deliver dependable brands of top quality wood preservatives and fire retardant products that our customers have come to trust.

Our 80-year tradition of being a leader in the research and development of new and innovative products and services is an integral part of the business and will remain in the years to come.

PROTIM[®] Solignum[®] Timber Care Product Range

PRODUCT RANGE	TREATMENT PURPOSE	SUGGESTED APPLICATIONS	APPLICATIONS METHODS	 IN GROUND	 ABOVE GROUND	 WATER REPELLENT	 UV PROTECT	 CLEAR FINISH	 COLOURED FINISH	
RESEAL										
XJ[™] Timber Protective Clear	 General preservative for all outdoor timber requiring a clear finish. Protects from fungal decay, borers and termites. Reseals 'cut ends' of LOSP and 'blue' pine framing.	Window frames, external doors, gates, fences, handrails, outdoor furniture.	 BRUSH ON							
CN Timber Oil Timber Protective	 Heavy duty general purpose preservative for hardwoods and softwoods to protect against fungal decay and wood borers. Reseal cut ends of MicroPro [®] , Lifewood [®] CCA [®] and Naturewood [®] ACQ [®] treated timber.	Fences, landscaping, wharves, bridges, engineered structures.	 BRUSH ON							
PROTECT										
CN Emulsion Timber Protective	 Super heavy duty protection from fungal decay and wood borers of timber and timber structures, particularly when in ground contact.	Poles, bolt holes, interfaces and joints in high hazard situations.	Spread by spatula.							
FINISH										
Raincoat[™] - Clear - UV Plus	 A water repellent finish for treated and untreated timber, reducing checking, splitting or movement. Penetrates to protect and enhance the beauty of all timber*.	Decks, fences, cladding, furniture, lattice, windows, pergolas and any exterior structures.	 BRUSH ON  SPRAY ON							

Koppers recommends reading product label instructions before use in regard to application, safety and storage. Re-application may be required to maintain product effectiveness; particularly in high hazard situations.

* Koppers recommends the use of lighter colour paints or stains to provide a more durable result.

This product is directly compatible with other alkyd or oil based paints and stains.

When using acrylic or other water-based products, first coat with an oil based primer.
